

NF18MESH Quick Start Guide

FTTN/B Connections

WHAT'S IN THE BOX

SAFETY INFORMATION Please read before use

		3
۲	1	
-	J	

Location

The gateway is designed for indoor use only. Place the gateway in a central location for the best WiFi performance.

5	\uparrow	7
\leftarrow		\rightarrow
	S	

Airflow

- Do not restrict airflow around the gateway.
- The gateway is air cooled and may overheat where airflow has been restricted.
- Always allow minimum clearance of 5cm around all sides and the top of the gateway.
- The gateway may become warm during normal use. Do not cover, do not put in an enclosed space, do not put under or behind large items of furniture.

-	
зў:	80

Environment

- Do not place the gateway in direct sunlight or any hot areas.
- Safe operating temperature of the gateway is between 0° and 40°C
- Do not allow the gateway to come in contact with any liquid or moisture.
- Do not place the gateway in any wet or humid areas such as kitchen, bathroom or laundry rooms.

6	-d	F
	-	Ъ

Power Supply

Always use only the power supply unit that came with the gateway. You should immediately stop using the power supply unit if the cable or power supply unit is damaged.

Service

There are no user-serviceable components in the gateway. Do not attempt to disassemble, repair, or modify the gateway.

112-11-6	
Z)

Small Children

Do not leave the gateway and its accessories within the reach of small children or allow them to play with it. The gateway contains small parts with sharp edges that may cause an injury or which could become detached and create a choking hazard.

<u> </u>	

RF Exposure

The gateway contains a transmitter and a receiver. When it is on, it receives and transmits RF energy. The gateway conforms with the radio frequency (RF) exposure limits adopted by the Australian Communications and Media Authority Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2014, when used at a distance of not less than 20 cm from the body.)

	6	1	1	
		()		
1.1.	2	Z	2	

Product Handling

- Always treat the gateway and its accessories with care and keep it in a clean and dust-free place.
- Do not expose the gateway or its accessories to open flames.
- Do not drop, throw or try to bend the gateway or its accessories.
- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the gateway or its accessories.
- Please check local regulations for disposal of electronic products.
- Arrange power and Ethernet cables in a manner such that they are not likely to be stepped on or have items placed on them.

GETTING STARTED

Pre-configured?

If you received the Netcomm NF18MESH modem from Tangerine, the device will be pre-configured. Follow the steps specific to your FTTN/B NBN connection on the following pages to get connected.

HOW TO CONNECT TO CONNECTIONS TO CONNECTIONS

GETTING STARTED

Step 1

Locate the telephone wall socket in your property that has been activated for NBN. Please note that there may be multiple telephone wall sockets in your property.

Step 2

Disconnect all equipment from your telephone sockets. This includes phones and fax machines plugged in around the property. These devices will interfere with the NBN signal

Step 3

Connect your modem to the telephone wall socket using the DSL port on the back of the Netcomm modem and power it on. It is important to use the first (main) socket at your property. If you are unsure of this, you may require a private phone technician to check your wiring.

Step 4

After you have connected the modem to the wall socket and powered it up, wait up to five minutes, after which the lights on the modem should stop flashing and become steady. This shows you that you have successfully connected the modem to the line that NBN is active on. If they don't not stop flashing, you should try alternative telephone wall sockets in the property until it does.

Once successfully connected to the network, the Power, WAN & WiFi 2.4 – 5 lights will display a steady green light. The internet light will be flashing.

Final Steps

After you've completed the steps to connect your NetComm NF18MESH modem, wait up to 20 mins to connect to your devices.

Once connected, run a test to check the speed of your connection at www.speedtest.net

If the modem is still not connected after 20 minutes, please contact our technical support team for further assistance:

Technical Support

If you require assistance setting up your BYO device our team is available.

8AM – 10PM WEEKDAYS, 8AM – 8PM SAT & SUNDAY AET Phone: 1800 211 112 Live Chat: www.tangerinetelecom.com.au

HOW TO CONNECT A NF18MESH MODEM

That is not pre-configured

LOGGING IN TO THE WEB INTERFACE

🚖 NetComm	
	LOGIN TO YOUR DEVICE Username Password
	login 2

1. Complete a factory reset of the modem

2. Open web browser

(such as Mozilla Firefox or Google Chrome), type http://cloudmesh.net into the address bar and press **Enter**. If you encounter difficulties connecting, type http://192.168.20.1 and press **Enter**.

3. At the login screen

Type **admin** into the **Username** field. In the **Password** field, enter the password printed on the gateway label (affixed to the back panel of the gateway) then click the **Login >** button.

Note - The graphics that appear in the section represent the display from a Windows browser. The same graphics will display differently when viewed on a hand held device.

If you're unable to login, perform a **factory reset** of the modem.

USING THE FIRST-TIME SETUP WIZARD

This Wizard is designed to walk you through the basic information needed to set up your device.

It is highly recommended that you use this wizard, however if you would like to skip straight to the main menu, click on <u>Skip to main menu</u>.

Yes, start the

setup wizard

No, skip to

Would you like to use the first time Setup Wizard?

Upon first login

🚔 NetComm

The gateway displays the first-time setup wizard. We recommend using the wizard to configure your Internet connection.

Click the Yes, start the setup wizard button.

USING THE FIRST-TIME SETUP WIZARD

1. Under Internet Services select VDSL.

2. Under Connection Type

select PPPoE.

3. Enter the details

Enter the details required for your specific Connection Type.

USING THE FIRST-TIME SETUP WIZARD WIRELESS

	WIRELESS	PHONE	GATEWAY SECURITY	TIMEZONE	SUMMARY	FOR A SEAMLES WIFI EXPERIENC Please keep the same
