FTTP Upgrade - Installation Process:

16. For a new FTTP service to be connected, the following steps must be completed:
 - a. **Pre-installation Visit:** Tangerine will arrange for an nbn[®] technician to assess the outside of your premises. If the pre-installation visit determines that extra infrastructure (e.g. trenching and conduit) is required to complete the installation, you will be advised by Tangerine of any additional costs that you are responsible for paying in order to proceed.
 - b. **Installation Appointment:** Tangerine will arrange for an nbn[®] technician to install the nbn[®] equipment inside and outside your premises. You, or an authorised person over the age of 18, will need to be present during the installation to give the technician both internal and external access to your premises.
17. Once your service upgrade is complete, you will need to connect to the new nbn[®] connection box by using an Ethernet cable and a compatible modem.

Service Transfer:

1. If you have an existing nbn[®] FTTN/FTTC service (including with Tangerine), is it important that you **do not** cancel this service until your FTTP upgrade is complete. This will ensure you are not left without an nbn[®] service while your FTTP upgrade is being installed.
2. If you have an existing FTTN or FTTC service, you will need to reconfigure your existing modem in accordance with our instructions before you can use your new FTTP service.
3. **Important:** If you have an existing FTTN or FTTC service with Tangerine, you are responsible for cancelling your existing service once your FTTP upgrade is complete. You will continue to be charged for both services until you complete this cancellation. You can cancel your service through the Customer portal.
4. If you have an existing service with another provider, you are responsible for cancelling your existing service with that provider once your FTTP upgrade is complete. You may continue to be charged for both services until you complete this cancellation.
